

# Cobalt™ Hybrid St. Augustine Quality Control Guidelines

## Cobalt Plant Stock Area

The designated Cobalt Plant Stock Area must be a minimum of 2 acres and may be expanded in a subsequent planting up to a total of 20 acres.

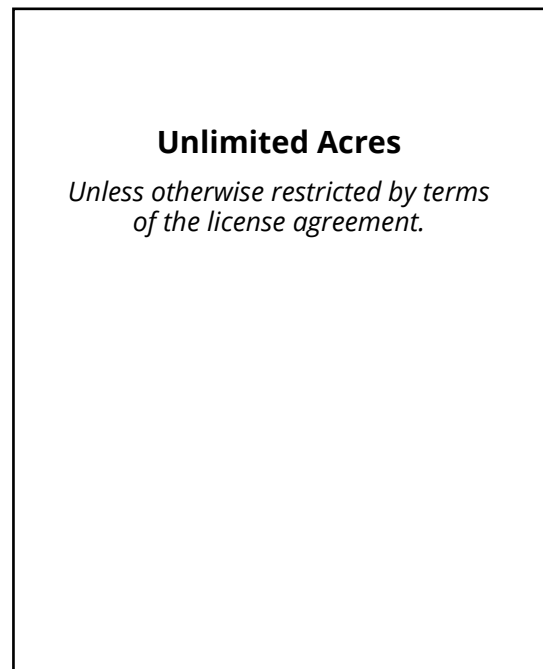

Plant stock must be obtained from a source designated and approved by Sod Solutions.

This area MUST be Certified by your AOSCA state agency or Accredited by SALT.

## All Future Expansions

The Cobalt Plant Stock Area MUST be the source from which all other expansions are made.

Expansions from fields that are not Certified or Accredited are prohibited.

For the area outside of the Cobalt Plant Stock Area, Certification by your AOSCA state agency or Accreditation by SALT is at the discretion of the grower and is NOT required.
